

Hyundai Hope On Wheels™  
*Helping kids fight cancer*

**10 YEARS OF FIGHTING PEDIATRIC CANCER**

## **Hyundai Hope on Wheels Hyundai Scholar Research**

**Dr. Brian Cauff**  
Joe DiMaggio Children's Hospital

Dr. Cauff is involved in clinical research in Pediatric Hematology/Oncology. He is an active member of the Children's Oncology Group. The Children's Oncology Group (COG) is a worldwide research group supported by the **National Cancer Institute** (NCI) with the mission "to cure and prevent childhood and adolescent cancer through scientific discovery and compassionate care". All his cancer patients are entered into the Children's Oncology Group registry and into clinical trials if appropriate. He oversees all policies, procedures and treatment plans to make sure that the research protocols are rigorously followed to insure the best outcomes. Data from his patients is used to develop standardized, evidence-based protocols for pediatric cancer patients. This data is also periodically published in national medical journals.

Dr. Cauff recently published a case report:

Cauff BE, Quinn CT; Transient parvovirus-associated hypoplasia of multiple peripheral blood cell lines in children with chronic hemolytic anemia.

**Pediatric Blood Cancer.** 2008 Apr;50(4):861-4

Dr. Cauff has participated in basic science research during his fellowship and maintains an interest in this area.
